

Amendments to the Claims

Claims 1-8 (Cancelled)

① Claim 9 (Currently amended) A resin coated steel sheet comprising a galvanized alloy steel sheet and an organic resin layer formed on at least one surface of said galvanized steel sheet;

wherein a galvanized alloy plating is formed on at least one surface of a steel sheet and the sheet having the galvanized alloy thereon is treated with an anodic treatment in acid solution, wherein the composite composition of the acid solution is the same as ~~that in a bath composition of the galvanized alloy plating bath or the composite includes at least one ion selected from the group consisting of Zn ion, Co ion, Ni ion, Mo ion, Fe ion, Sn ion, Cu ion, nitride ion, sulfate ion, phosphate ion, and ammonium ion,~~ wherein the at least one surface of the galvanized alloy steel sheet is blackened to have an L-value equal to or less than 30.

Claim 10 (Currently amended) A resin coated steel sheet comprising a galvanized alloy steel sheet and an organic resin layer formed on at least one surface of the galvanized alloy steel sheet, wherein a galvanized alloy plating is formed on at least one surface of a steel sheet and the sheet having the galvanized alloy thereon is treated by an anodic treatment in acid solution, wherein the composite composition of the acid solution is the same as ~~that in the~~ composition of the

1 | ~~galvanized alloy plating bath or the composite includes at least~~  
~~one ion selected from the group consisting of Zn ion, Co ion, Ni~~  
~~ion, Mo ion, Fe ion, Sn ion, Cu ion, nitride ion, sulfate ion,~~  
~~phosphate ion, and ammonium ion, wherein the at least one~~  
surface of the galvanized alloy steel sheet is blackened to have  
an L-value equal to or less than 30, and said organic resin  
layer includes at least one of colloidal silica and an agent  
providing a lubricant function at a surface of the organic resin  
layer.

Claim 11(Previously presented) The resin coated steel  
sheet according to claim 9 wherein the resin is selected from  
the group consisting of urethane resins, polyester resins,  
acrylic resins, and olefin resins.

Claim 12(Previously presented) The resin coated steel  
sheet according to claim 10 wherein the resin is selected from  
the group consisting of urethane resins, polyester resins,  
acrylic resins, and olefin resins.

Claim 13(Previously presented) The resin coated steel  
sheet according to claim 9 wherein the resin is a urethane resin  
having a pencil hardness of individual resin of H to 6H, a  
tensile strength of 300 to 500 kg/cm<sup>2</sup> and an extension ratio of  
250 to 450%.

Claim 14(Previously presented) The resin coated steel  
sheet according to claim 10 wherein the resin is a urethane

1  
resin having a pencil hardness of individual resin of H to 6H, a tensile strength of 300 to 500 kg/cm<sup>2</sup> and an extension ratio of 250 to 450%.

Claim 15(Previously presented) The resin coated steel sheet according to claim 10 wherein the organic resin layer includes colloidal silica of equal to or less than 50 wt%, polytetrafluoroethylene, and optionally 20 wt% or less of at least one of polytetrafluoroethylene or polyethylene wax.

Claim 16(Previously presented) The resin coated steel sheet according to claim 9 wherein the organic resin layer includes at least one member of the group consisting of 0.01 to 3 wt% anti-rust agent, 0.05 to 1 wt% silane coupling agent, and 0.1 to 3.0 wt% black pigment.

Claim 17(Previously presented) The resin coated steel sheet according to claim 10 wherein the organic resin layer includes at least one member of the group consisting of 0.01 to 3 wt% anti-rust agent, 0.05 to 1 wt% silane coupling agent, and 0.1 to 3.0 wt% black pigment.

Claim 18(Previously presented) A patrone cap made of a resin coated steel sheet according to claim 9.

Claim 19(Previously presented) A patrone cap made of a resin coated steel sheet according to claim 10.

Claim 20(Previously presented) A patrone body made of a resin coated steel sheet according to claim 9.

*DI  
concl* Claim 21 (Previously presented) A patrone body made of  
a resin coated steel sheet according to claim 10.

Claim 22 (New) The resin coated steel sheet according  
to claim 9 wherein the blackened surface of the galvanized alloy  
steel sheet is formed from at least one at least one kind of  
hydrate oxide selected from the group consisting of hydrate  
oxides of Zn, Co, Ni and Mo.

Claim 23 (New) The resin coated steel sheet according to  
claim 10 wherein the blackened surface of the galvanized alloy  
steel sheet is formed from at least one at least one kind of  
hydrate oxide selected from the group consisting of hydrate  
oxides of Zn, Co, Ni and Mo.
